Ahmed Hossam

Backend Software Engineer | Node.js

Portfolio | GitHub | LinkedIn | ahmedhossameissa25@gmail.com | +201060919723

Military Service: Completed

About Me

Backend Engineer specializing in Node.js and scalable server-side applications, with experience in AI evaluation, code preference analysis, debugging, and assessing code quality, correctness, and maintainability.

Education

2020 - 2025 Bachelor of Computer and Communication Engineering | Alexandria University
GPA: 3.54/4.0 | Excellent with Honors

Work Experience

AI Code Evaluator at Outlier — November 2024 - Present

- Evaluated AI-generated code for correctness, functionality, and quality. Completed 300+ AI evaluation tasks involving code review, debugging, and solution comparison.
- Debugged React.js and Node.js applications, evaluated code preferences, and assessed AI responses for accuracy, quality, and instruction compliance.

Backend Developer Intern at TeknoSoft — March 2024 - May 2024

- Developed server-side applications using Node.js and Express.js, implementing routing, middleware, RESTful APIs, and authentication features, including Google Sign-In and protected resources.
- Built a To-Do List web application using PostgreSQL, EJS, and jQuery, implementing user-specific task management and integrating database operations with dynamic web interfaces.

Frontend Developer Intern at RMZTECH — August 2023 - September 2023

- Developed Quoraa, a fully responsive web application using Vue.js and Tailwind CSS, building reusable components and adaptable layouts.
- Implemented user-friendly frontend interfaces using HTML, CSS, JavaScript, Bootstrap, and Tailwind CSS, following component-based development and maintainable UI practices.

Projects

Deep Fake Audios — Link to Repository

React.js · Node.js · Flutter · AI · SQL — *Graduation Project | Role: Flutter and Database Engineer*

- Developed the mobile application using Flutter, implementing the user interface and integrating core features including Deepfake Audio Detection, Speech-to-Speech, Text-to-Speech, and an interactive detection game.
- Designed and implemented the database, defining table structures, relationships, and constraints for users, audio data.

Car Rental System — Link to Repository

Vue.js · JavaScript · PHP · SQL · HTML/CSS — *Team Project | Role: Database Engineer*

- Designed the relational database and SQL queries for cars, customers, reservations, and payments.
- Contributed to vehicle search, reservation workflows, the Admin Dashboard, and date-based reporting.

Chat App — Link to Repository

- Developed a real-time chat application with user authentication and live messaging using Flutter.

Bookly App — Link to Repository

- Developed a book browsing app using MVVM architecture, featuring book search and detailed book information.

Technical Skills and Tools

- **Backend:** Node.js, Express.js, RESTful APIs, Authentication & Authorization, OAuth 2.0
- **Databases:** PostgreSQL, SQL, Relational Databases
- **AI Evaluation:** LLMs, Code Preference Evaluation
- **Frontend & Mobile:** JavaScript (ES6+), HTML5, CSS3, EJS, jQuery, Flutter
- **Tools:** Git, GitHub, Docker
